An Update to
Thunderbird, Enigmail and p≡p

OpenPGP Email Summit, 5. December 2015

Patrick Brunschwig
patrick@enigmail.net

Enigmail and p≡p

- Enigmail will use pEp Engine for mail encryption
- New "invisible" (junior) mode for users who don't care about encryption
- Full Enigmail functionality still available for advanced users
- A paid pEp developer works on:
  - Adaption of Thunderbird for pEp
  - Integration of pEp & Enigmail

Thunderbird, p≡p and Enigmail

pEp is likely to fund Thunderbird development in the future

Enigmail with pEp will be included in Thunderbird

… and Thunderbird will move away from Mozilla
